

## What is nexo®?

nexo® is an enterprise-ready unified communications service. nexo® connects you with your team, anywhere, anytime from any device. nexo® provides a consistent, single client experience for presence, instant messaging, voice, video and conference calls.

nexo® provides enterprise voice and video capabilities that can enhance or replace traditional telephone systems. These capabilities include common calling features such as answer, forward, transfer, hold, divert, voice mail, and much more. Users can access these features over the Internet with our without using a VPN connection.

Users can send messages to each other in real-time using the Instant Messaging features in nexo® and can share status information with one another via presence. Presence is a collection of information about a contact in nexo® that includes availability, willingness to communicate, additional notes (such as location and status), and contact options by customizing their status.

nexo® provides a feature rich private and secure voice, video, Instant Messaging and presence across smart phones, tablets, Mac and PCs.
